abdallahjeff93@gmail.com

El jadida , Morocco

I'm Abdallah, a passionate Software Developer and Web Developer. I have a strong foundation in programming, system development, and full-stack web technologies.
 After completing the Common Core at **1337** (42 Network), I built real-world projects that strengthened my skills in C programming, algorithms, networking, and modern web development with React, Node.js, and Docker.

EDUCATION

2022 - present
Student at 1337 (42 Network)
Software Engineering Program – Peer-

Learning Curriculum

SKILLS

Languages: C, C++, JavaScript , Python

Technologies: React, Node.js, Docker

 WebSocket, NGINX, Git .

Spoken Languages:

Arabic (native)

English (professional working proficiency)

WORK EXPERIENCE

Inception (42 Project)
Docker | Networking | System Administration

- Built a secure, scalable web infrastructure entirely with Docker containers.
- Deployed and configured NGINX, WordPress, MariaDB, and Redis in isolated containers.
- Tools: Docker, Docker Compose, NGINX, WordPress, MariaDB, Redis, OpenSSL.

ft_transcendence (42 Project)
Full-Stack Development | WebSockets | Docker

Built a full-stack real-time multiplayer web app with authentication, matchmaking, and chat features.
Developed with NestJS, React, WebSockets, and deployed using Docker.
Technologies: HTML & CSS · pure Javascript · Django· WebSocket · PostgreSQL · Docker · OAuth 2.0 · JWT

carpool
Full-Stack Development | WebSockets | Docker

Developed a ride-sharing web application for users to create, search, and join carpool trips. Built a full-stack solution with authentication, trip management, and booking features.
Technologies: Node.js · Express · React · PostgreSQL · JWT · Docker · REST API
